A. [Smiling Planet](#)

An eco-conscious, planet loving team of people have created Smiling Planet – a range of eco-friendly home-ware for kids, which includes plates, placemats and posters. Each design carries a heartfelt message about caring for your planet and those around you. Their placemats shown above, are made from a safe revolutionary polymer that can be recycled, and each design has been printed with safe, water based inks. You'll see more Smiling Planet goods in the next issue of [LMNOP](#).

B. [Hummingbaby](#)

Hummingbaby's 26-piece Fall collection, *Red Dragonflies*, features exquisite pieces made of fine double gauze cotton. Tiny, whimsical prints and pretty styles were presented at [Bubble NY](#) in five colour ways – turquoise, green, red, purple, pink and black. Alex capes, the Dakota pant and the Olivia dress were amongst our favourite styles. Designer, Suna Ruhren drew inspiration for this collection from her daily childhood visits to a park on the Japanese peninsula of Chiba.
